### DETAILED ACTION

1. This application is acknowledged as a Continuation of application 09/904,834, filed 7/16/01. The preliminary amendment filed 7/3/03 has been entered. Claims 28-32 are pending.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 28-32 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 6-8 and 18, respectively, of U.S. Patent No. 6,594,565. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims are directed to common subject matter with minor differences. For example, in application claim 1 a "power supply" is claimed whereas patent claim 1 recites "a battery", which is a particular type of power supply. Further, application claim 1 generally refers to sensor parameters (i.e., position of the gear shift lever) whereas patent claim 1 specifically senses if the shift lever is in park. The broader scope of the application claims covers the more narrower limitations of the patent claims. The scope of

Art Unit: 3661

application claim 32 overlaps the subject matter of patent claim 18 in a similar manner.

Dependent claims 29-31 are essentially identical to patent claims 6-8.

4. The enclosed PTO-892 lists documents considered during prosecution of the parent application as well as newly cited U.S. Patent No. 6,122,682, which is of general background interest. Copies of the previously cited documents are not being provided.
